

Your recycling needs. Our grinding solutions.

## THERMOFORMING

Granulators cater for 100 to 5.000 kg/hr; for start-up of full sheets, sheets with cups and skeletal waste

Sheets width from 600 to 2.000 mm, up to 250 mm products height, up to 3 mm thickness

Granulators installed under trim press or stacking station, at the end of the line or into a pit to be perfectly matched to all thermoforming machines

### **Regrind quality material**

Homogeneous and uniform regrind constantly produced. Mechanical and physical properties of plastics unchanged.

 Efficient grinding thanks to the fixed knives at 0°
Reliability and no long production thanks to special design of traction group and grinding chamber

## **Efficient solutions**

Design of dedicated machines for a full integration into the thermoforming process, even thanks to compact footprint and sound enclosure on board.

- Physical integration, under shearing machine, into the pit, in box
- Full integration into the process thanks to the very high automation due to pneumatical dancing arms, inverters and traction units

#### Easy operation and maintenance

## Energy efficiency

Low running cost expressed in kWh/kg. Reaction power coso reduced to minimum thus having a direct impact on hourly energy cost.

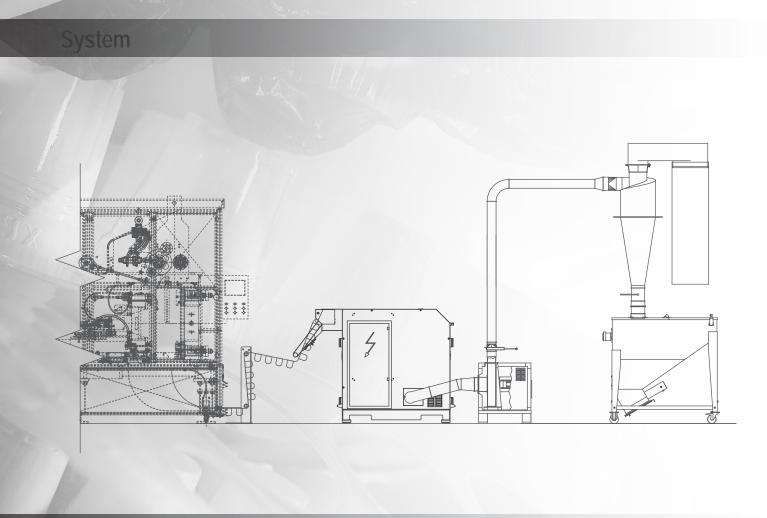

Keys for the fixing of motor pulley and fly-wheelPulley and fly-wheel design gives higher inertia

Reduced maintenance frequency and downtime thanks to advance engineering design. Safety of operator during use and maintenance.

- Easy access without the use of tools to the main parts subject to routine maintenance.
