

Your recycling needs. Our grinding solutions.

## BLOW MOULDING

Full range of granulators for small bottles, tanks and jerry cans up to 200 litres, coex fuel tanks 15 kg, IBC container, without pre-cutting

In-line grinding of pieces from blow molding and runners up to 180°C

23.000 bottles/h of 0,75 litre ground at start up, without fly-back

## Regrind quality material

Homogeneous and uniform regrind constantly produced. Mechanical and physical properties of plastics unchanged.

- Increased gripping ability for a bigger productivity, especially for voluminous and light small blow mouldings and large productions

## Efficient solutions

Return on investment specific to each application, reliability through running time, maintenance frequency according to production line down time.

- Specific cutting chamber section
- Water cooling, side discs, antiwear treatment and open rotor allow in-line grinding of pieces from blow molding and top&tail up to 180°C

## Energy efficiency

Low running cost expressed in kWh/kg. Reaction power  $\cos\phi$  reduced to minimum thus having a direct impact on hourly energy cost.

- Combined effect with different cutting angles (arrow and scissor) to minimize effort of cutting.

## Easy operation and maintenance

Reduced maintenance frequency and downtime by advance engineering design. Safety of operator during use and maintenance.

- Easy tool free access to screen, hopper, grinding chamber.

# System

## Our granulators

BM Series  
BM 3530  
BM 5030  
BM 7030
